

MPConverter Ver 1.2.0.0

Version 1.2 incorporates a correction where multiple equal scores at the end of the award list of pairs eligible for Master Points were awarded less than 6 MPs. The 6 MPs at the bottom of the award list are now no longer shared. All equal pairs at the end of the award list are now correctly awarded 6 Master points. (See WBU Master Point docs).

To install the program :-

1. Delete any installed copy of MPConverter by using "Settings" -> "Apps" -> "Installed apps" then scroll down the list to MPConverter and click the 3 dots followed by uninstall.

2. Delete the Icon on the desktop if windows uninstall has not removed it.

2. Unpack the ZIP directory and in the unpacked directory double-click setup.exe and allow the program to install when queried by the Windows Operating system.

If you have any problems you can email me at [MG-Online@outlook.com](mailto:MG-Online@outlook.com).
